

# Focus Group Camera Club

## December 9, 2008 - Meeting Minutes

- President Bob Jones opened the meeting by:
  - + Thanking Sid for a great job on the FGCC website
  - + Encouraging members to put some of their images on the members gallery, if they haven't done so as of yet
  - + Announcing that David Everette would lead a field trip sometime in the future to one of his favorite places on the James River (with a slide night on the following Thursday)
- Vice-president, Chuck Spalding presented a program on preparing image files for printing. He had prepared a handout which outlined the issues involved. The topics covered included the display requirements of large prints; the importance of capturing good files; post-processing with special emphasis on image sizing and printing resolution; color management, orderly workflows and sharpening. It was obvious to everyone that Chuck had put a lot of time and effort into the presentation and we all really appreciated it.
- President Bob Jones gave the instructions for the 'brown bag' project. These are available on the FGCC website. He gave out 14 bags and it now appears the number has grown to 20 members who are interested in participating in the project (i.e. fun)
- The members who had slides submitted for the roundtable tonight were:

Gilpin, Sallie, Sid, Tim, Hal, Bob Jones, Bev, Chuck, Al and Ed.

Jack Brooks a long-time friend of the club showed some of his recent prints.
